

**DL 2152  
KIT FOR BASIC  
ELECTRONICS EXER-  
CISES**

The kit includes a set of components allowing a full course on general electronics to be developed. All components are mounted on a printed circuit board fixed to metal tacks anchored on transparent plastic material modules, allowing consequently the vision of the components and the related symbol silk-screened on the PCB, the mechanic protection of the component, the electric safety against accidental contacts and easy replacement of damaged components. All the modules are ready to be placed on a rubber circuit designer included in the kit. The set of modules is housed in a briefcase. From the educational point of view, the student is trained in component recognition and in acquiring the manual skill necessary to realize a circuit following the diagrams reported in the handbook.

**Accessories and Instrumentation**  
- DL 2152AL Power supply  
- Universal multimeter  
- Dual trace oscilloscope
